

777 PROFESSIONAL

For the last 15 years the 777 has set the standard for twin-engined airliners. With a high passenger capacity and amazing range it is still at the forefront of aviation technology.

PSS have created a 777 in -200LR, -200LRF and -300ER variants for Flight Simulator 2004 that represents the pinnacle of airline simulation.

UK Barcode: **5035063004882**

German Barcode: **5035063004875**

French Barcode: **5035063004868**

Developed by: **PSS (Phoenix Simulation Software)**

Box size: **DVD Amaray packaging**

What the papers say:

"Phoenix are no strangers to innovation..." Flightsim.com

The Just Flight 'Professional' series is a watchword in simulation circles for quality airliners and this latest release of the popular 777 in -200LR, -200LRF (Freight) and -300ER variants is no exception! Five years ago PSS (Phoenix Simulation Software) were the first developers to re-create this amazing plane for Flight Simulator and it gave rise to the brilliant reputation they enjoy today. Now they've developed another landmark 777 in -200 and -300 variants for Flight Simulator 2004 that represents the pinnacle of airline simulation. From the fully interactive virtual cockpit to the APU inlet at the tail, 777 Professional is a work of art!

The 777 comes with 26 high quality airline liveries from around the globe and boasts authentic flight modelling as well as a very high quality visual model. At the business end virtual pilots can choose between a superb 2D instrument panel with state-of-the-art gauges or a fully interactive virtual cockpit.

Airliner fans will love the animated undercarriage, including "gear droop"; flaps, elevators, rudder, spoilers, ailerons, flexing wings, APU Inlet RAM air turbine, cargo and cabin doors – the attention to detail is inspired

Accurately designed virtual cockpit includes moving yokes, pedals, throttles; reflective gauges, lighting and much more

The only people to experience a higher level of detail are real 777 pilots!

SOFTWARE REQUIREMENTS: Flight Simulator 2004, Windows XP, DirectX8.1 (or later)

MINIMUM HARDWARE REQUIREMENTS: PC with 1.7 GHz equivalent or higher processor, 512Mb RAM. 64Mb DirectX 8.1 compatible video card required, hard disk space: TBA
