

FS Design Studio *Create Aircraft and 3D Scenery Easily*

Thousands of users worldwide use FS Design Studio because it's the only "flight simulator friendly" way to design flyable aircraft as well as 3-D scenery

Creates aircraft to take full advantage of the FS2002 advancements such as reflective textures and improved framerates.

Convenient toolbar buttons to generate aircraft and scenery.

Ruler tool indicates distance and angle between two points.

Assembly mode lets you operate on a set of objects organized in a hierarchy, or tree structure and each part can be "attached" to another part. In assembly mode, drag a part and all attached parts are moved with it.

FS Design Studio V2 is now more powerful, too. It adds the latest visual techniques and graphic effects to an already large set of commands, timesaving shortcuts and comfortable user interface.

Aircrafts Created Using FS Design Studio v2

Superior texture handling, larger mapping window, texture filling for multiple copies, non-square textures, automatic copying to FS folder part.

Built-in support for animation.

They've here to help you create any type of accurate, detailed model in record time. It's the choice of beginners and professionals alike.

System Requirements

- IBM Corporation PC
- Microsoft Windows
- 32 MB RAM
- 30 MB HD Space
- Video Card with 16MB RAM
- Microsoft Flight Simulator 2000, 2002 or Microsoft Combat Flight Simulator
