

LOCK ON GOLD

AIR COMBAT SIMULATION

"Lock on Gold: Modern Air Combat is one of the premier flight simulators today and one of only two decent modern aerial warfare simulators."

"For dedicated Simmers it really doesn't get much better than this."

GamesAxis On-line review score 8.4

Background

Lock On Gold is an updated version of the highly acclaimed Lock On Modern Air Combat released back in 2003. This new version has many improvements including but not limited to a new Russian aircraft, the Su-25T and the Flaming Cliffs campaign. The product is already receiving fantastic press reviews with an average of 85% review scores.

The theatre of operation is the Black Sea and a fictional conflict sees the deployment of both American and Russian forces to the area. Look out for SAM sites and US and Russian carriers.

New version capabilities include

- The addition of the Su-25T as a player flyable aircraft
- Training missions with voice-over instruction
- Three new, 20 plus missions campaigns
- Improved ground texture with even greater detail
- New ground textures for winter, spring, summer & autumn
- New military and civilian ground facilities
- New aircraft skins
- New single missions
- Adjusted and added documentation

Competition

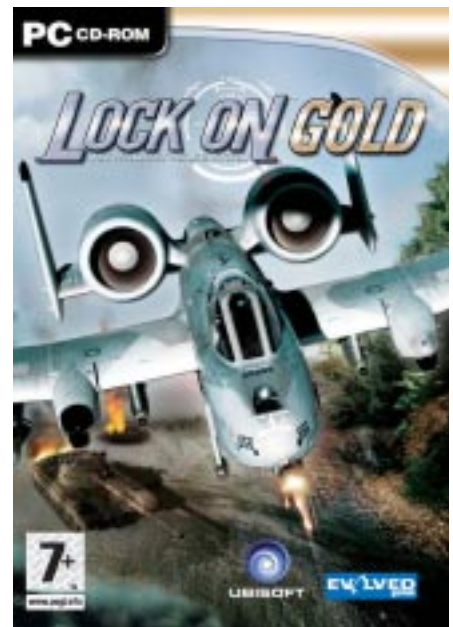

The only serious competitor is Falcon 4.0 but only in so much as a Coke/Pepsi style debate that really comes down to personal choice.

Serious addicts would definitely buy both.

Release Information

Street date	28 th April 2006
Barcode	5060023 731461
RRP	£19.99
Packaging	DVD style case
