

ROADS & RIVERS OF EUROPE

A unique expansion for Flight Simulator 2004 that places the roads, rivers and coastlines of Europe in their correct locations.

Virtual pilots will now be able to find their way across Europe using the same important landmarks as their real-world counterparts.

Developed by: **FS Quality**

Box size: **DVD Amaray packaging**

When pilots fly cross-country they use a range of landmarks on the ground to help them find their way and pinpoint their position. The most distinctive of these are roads, rivers and coastlines, but in Flight Simulator 2004 these simply aren't reproduced accurately enough to allow them to be used for navigation. All this is about to change thanks to Roads & Rivers of Europe, which updates the default scenery of Europe with a set of accurately placed roads, rivers coastlines that are positioned to within 15 metres of the real thing.

Using high-quality in-car NAVTEQ GPS navigation data, Roads & Rivers of Europe maps major and minor roads as well as motorways, autoroutes and autobahns. The accuracy doesn't stop with tarmac - all the major rivers, inlets and coastlines are correctly positioned, while lakes and other water features missing from the default scenery are replaced.

- Roads & Rivers of Europe covers the following countries: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Ireland, Italy, Luxembourg, The Netherlands, Norway, Spain, Sweden, Switzerland, Portugal and the United Kingdom.
- Detailed and complex road intersections are modelled.
- Main roads in cities are included.
- The size of roads varies according to their real world classification
- Road bends and junctions accurately shown.
- The course and size of major rivers are accurately depicted.
- Coastlines and major inlets, small bays and even large marinas are placed correctly in the default scenery.

SOFTWARE REQUIREMENTS: Flight Simulator 2004, Windows XP - DirectX8.1 (or later)

MINIMUM HARDWARE REQUIREMENTS: PC with 1.8 GHz equivalent or higher processor, DVD-ROM drive, 512 Mb RAM, 32 Mb DirectX 8.1 compatible video card, 750Mb hard disk space
