Easy USB Installation

"It offers realistic control, has a quality feel to it and it will enhance your entire virtual flying experience. The Control Center recommends the yoke to anyone looking for an affordable, highly realistic flight controller."

The Control Center

Flight Sim Yoke USB

Command the skies with the king of flight simulator controls, the Flight Sim Yoke USB. This one of a kind yoke offers features that will allow you to fly with the realism you've come to expect from CH Products. Pilots around the world applaud the comfortably placed prop, throttle and mixture levers. It's the closest thing you'll get to sitting in your own cockpit.

Features:

- ▶ New ergonomic designed yoke movement without a center detent allowing the ultimate in control
- ▶ 5 axes of control including, pitch, roll, throttle lever, propeller lever, and mixture lever
- ▶ 20 button functions including, 2-way gear switch, 2-way flaps switch, 8-way hat switch, two 2-way rocker switches, and 4 push buttons
- ▶ Precision adjustment wheel for precise electronic centering
- ▶ 7 foot cable plus easy setup
- ▶ USB provides true Plug & Play and greater speed and accuracy
- ▶ Three-year limited warranty
- ▶ Compatible with Pro Pedals USB

Pro Pedals USB

If it's realism you're after, step into our USB Pro Pedals. With differential toe brake support and an accelerator/brake function, these pedals can take you from the airfield right down to the racetrack. Don't forget to buckle up!

Features:

- ▶ Sliding motion of forward/backward gives rudder input for the "yaw" axis.
- ▶ Heel-toe motion gives differential toe braking control.
- ▶ Three axes of control
- ▶ Plane or car simulator control Seven foot cable
- ▶ Toe Brakes tested and fully functional in the "Fly!" flight simulator (PC Version), Microsoft Flight Sim 2000 and Flight Sim 2002.
- ▶ Three-year limited warranty

"After a couple of weeks with the Pro Pedals USB, I don't see how I ever managed to fly without them"
